Experiences

May 2024 - Full-stack at Ascend (Full-time)

Present Project: Lotus's CMS

Responsibilities

- Led the frontend development of the CMS Lotus project, overseeing implementation and ensuring alignment with project goals.
- Provided consultation on user journey design and security best practices; also served as a code reviewer to maintain code quality and consistency.
- Designed frontend architecture, including UX/UI elements and API integration to support seamless user interaction and system functionality.
- Diagnosed and resolved production issues, ensuring high availability and performance through proactive monitoring and troubleshooting.

Mar 2023 - Front-end at MTL (Full-time)

Apr 2024 Project: GISX is Group insurance

Responsibilities

- Led the development of major features and coordinated task planning for team members to ensure efficient and timely delivery.
- Acted as a consultant for both business and technical design decisions, and served as a code reviewer to uphold quality and best practices.
- Implemented the base architecture of the core project using a Micro Frontend approach to enable modular and scalable development.
- Estimated development efforts and contributed to product planning and decision-making, ensuring realistic timelines and achievable milestones.

Aug 2021 - Front-end at Shippop (Contract & Cooperation Education)

Feb 2023 Project: Shippop global is global shipping website
Project: All Express is MLM shipping website

Responsibilities

- Planned and managed sprint tasks based on product backlog.
- Analyzed and designed systems from UX/UI prototypes.
- Developed frontend features and API gateways.
- Implemented security for authorization and transaction flows.
- Improved SEO performance and integrated analytics using Clarity and Google Analytics.
- Performed system testing and validation prior to deployment.
- Automated tests using Cypress within CI pipelines.
- Deployed applications via CI/CD using Azure DevOps.
- Designed and configured project infrastructure.

Education

King mongkut's institute of technology ladkrabang (KMITL) 2018-2022

- Bachelor of Information Technology
- Major: Software Engineering
 - GPA: 3.39 (Second class honors)

Skills

Architecture

- Micro frontend

Promgraming Languages

- Typescript, Python, C, Java, Go

Javascript framework & liberies

- Next.js (Solid), React, Node.js, Apollo GraphQL, Mui, Gsap, Redux, React-Native, Tailwind, Module-federation, Antdesign

Bundlers

- Vite, Webpack

Testing tools

- Cypress

DevOps

- Azure Service, Docker, Grafana

Databases

- SQL, NoSQL, Firebase, Mongo, Mysql

Project management methods

- Agile, Scrum, Extrean programming

Version Controls

- Github, Azure DevOps, Gitlab

Analytic services

- Clarity, Google Analytics
