Experiences

Aug 2025 - Jan 2026 Software Engineer at NocNoc (Full-time)

Project: Regional Platform (E-commerce platform)

- Designed system architecture for Buyer, Seller, and Admin platforms
- Led performance-driven development of Buyer features (PDP, PLP, Landing Pages) with focus on SEO, bundle optimization, security, and traffic efficiency
- Led problem analysis and solution design aligned with business goals, making strategic decisions and defining the technical direction across all three systems.

May 2024 - Aug 2025 Full-stack at Ascend (Full-time)

Project: Phoenix (Lotus's CMS)

- Led the frontend development of the CMS Lotus project, overseeing implementation and ensuring alignment with project goals.
- Provided consultation on user journey design and security best practices; also served as a code reviewer to maintain code quality and consistency.
- Designed frontend architecture, including UX/UI elements and API integration to support seamless user interaction and system functionality.
- Diagnosed and resolved production issues, ensuring high availability and performance through proactive monitoring and troubleshooting.

Mar 2023 - Apr 2024 Front-end at Mung Thai Life (Full-time)

Project: GISX (Core group insurance platform)

- Led the development of major features and coordinated task planning for team members to ensure efficient and timely delivery.
- Acted as a consultant for both business and technical design decisions, and served as a code reviewer to uphold quality and best practices.
- Implemented the base architecture of the core project using a Micro Frontend approach to enable modular and scalable development.
- Estimated development efforts and contributed to product planning and decision-making, ensuring realistic timelines and achievable milestones.

Aug 2021 - Feb 2023 Front-end at Shippop (Contract & Cooperation Education)

Project: Shippop global (Global shipping platform)

Project: All Express (MLM shipping platform)

- Planned and managed sprint tasks in alignment with the product backlog to ensure timely delivery of project milestones.
- Analyzed and designed system architectures based on UX/UI prototypes, optimizing usability and functionality.
- Developed frontend features and API gateways, ensuring seamless integration with backend services.
- Implemented robust security measures for authorization processes and transaction workflows.
- Enhanced SEO performance and integrated analytics tools, including Microsoft Clarity and Google Analytics, to optimize user engagement.
- Conducted comprehensive system testing and validation prior to deployment to ensure quality and reliability.
- Automated end-to-end tests using Cypress within CI pipelines to improve development efficiency and maintain code quality.
- Deployed applications through CI/CD pipelines leveraging Azure DevOps for streamlined release management.
- Designed and configured project infrastructure, ensuring scalability, reliability, and maintainability.

Education

2018-2022 ***King mongkut's institute of technology ladkrabang (KMITL)***

Bachelor of Information Technology in Major Software Engineering, GPA: 3.39 (Second class honors)

Technical Skills

Architecture & Design: Micro-frontend, System Architecture

Programming Languages: TypeScript, Python, C, Java, Go

Frontend Frameworks & Libraries: Next.js (App/Page structures), React, Node.js, Apollo GraphQL, MUI, GSAP, Redux, React Native, Tailwind CSS, Module Federation, Ant Design, Zustand, Zod, Yup, Radix, React-Query, Storybook, experience in creating reusable libraries

Bundlers & Build Tools: Vite, Webpack

Testing Tools: Cypress

DevOps & Cloud Services: Azure DevOps, Docker

Databases: SQL, NoSQL, Firebase, MongoDB, MySQL

Project Management & Methodologies: Agile, Scrum, Extreme Programming (XP)

Version Control Systems: GitHub, GitLab, Azure DevOps

Analytics & Monitoring: Microsoft Clarity, Google Analytics, Grafana, Jenkins, Headlamp

Techniques & Performance Optimization: Tree-shaking imports/exports, bundler optimization, image optimization, DOM reduction, network/traffic request optimization

Web security: CSRF, XSS, OAuth security protection
